Weight	191 kg

Husqvarna X4000-Soffcut

The Husqvarna X4000 is a self-propelled petrol saw designed for heavy-duty, commercial, industrial and paving applications. Featuring a 20HP twin cylinder engine with electric start, the X4000 is propelled by a hydrostatic transmission and the depth is controlled electronically.

Three blade widths can be used, allowing different joint widths and crack control simultaneously, making it a multipurpose, high productivity early entry saw.
