

# ELECTRIC PORTABLE REBAR BENDERS & CUTTERS

Hoppt Electric Portable Rebar Bender & Cutter is widely used in construction engineering for bending rebar, steel bar, steel rod etc. This Rebar Bending and Cutting Machine, combination cutting and bending function, improved the processing efficiency of steel bar/rebar.

RBC-25 Portable Bending and Cutting machine is used for bending 6mm-25mm rebar, cutting 4-25mm rebar.

Rebar Cutting Machine with Hydraulic drive, foot switch control operation with 5 seconds for any angle. The two-side type angle selector can be set to accurately bend to any angle from 0-180 degrees. It can preset the bending angles from the angle allocator. This machine is easy to maintain.

**HRBC-25**

**HRBC-32**

## ELECTRIC PORTABLE REBAR CUTTERS

Technical Data		
DESCRIPTION	HRBC-25	HRBC-32
Dimensions (LxWxH)	470x470x1000mm	600x580x980mm
Bending Capacity	Φ6 - 25mm	Φ6 - 32mm
Cutting Capacity	Φ4 - 25mm	Φ4 - 32mm
Bending Angle	0° - 180°	0° - 180°
Voltage	220V/110V	220V/110V
Bending wattage	1600W/1700W	2800W/3000W
Cutting Wattage	1300W/1440W	2800W/3000W
Weight	145 kg	225 kg
